CAREER OBJECTIVE

Detail-oriented and passionate Data Science professional with 2.5 years of experience as a Senior Lead Generation Executive and recently completed IBM Data Science certification. I am Skilled in Machine Learning, Deep Learning, NLP, and AI techniques. Looking to apply technical expertise and analytical skills to solve real-world data problems and contribute to business insights.

EDUCATION

B. Tech in Information Technology

2015 – 2019

Hindusthan College of Engineering and Technology, Coimbatore
CGPA: 6.38

CERTIFICATION

IBM Data Science Professional Certificate

Jan 2025-June 2025

SLA Institute, Chennai

Topics Covered:

Python, Pandas, NumPy, Matplotlib, Seaborn, SQL, Machine Learning, Deep Learning, AI, NLP, CV, Model Deployment using Streamlit.

TECHNICAL SKILLS

Languages & Libraries:

Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Tensor-Flow, Keras, PyTorch, OpenCV, NLTK, spaCy

ML & AI Techniques:

Linear & Logistic Regression, SVM, Decision Trees, Random Forest, KNN, XGBoost, Clustering (KMeans), Neural Networks, NLP, CV, YOLO, CNN, RNN, LSTM, LLMs

Tools:

Jupyter Notebook, Google Colab, Git, Excel

Database:

SQL

Soft Skills:

Problem-solving, Critical thinking, Communication, Teamwork, Time Management.

WORK EXPERIENCE

Senior Lead Generation Executive

GMA Business Group, Bangalore

Jan 2020 – May 2022

- Managed lead generation campaigns through Google Ads and SEO strategies.
- Executed and monitored email marketing campaigns for various B2B clients.
- Analyzed campaign performance metrics and optimized outreach strategies.
- Coordinated with sales and digital teams to drive qualified leads and improve conversions.
- Used Excel and automation tools for tracking campaign performance.

PROJECTS

1.Heart Disease Prediction (ML Classification)

Tools: Python, Pandas, Scikit-learn, Seaborn

- Built a Decision Tree model to predict heart disease based on patient health data.
- Performed data preprocessing, visualization, and model evaluation.

2.Image Classification – Sun vs Moon (CNN)

Tools: OpenCV, Python, Pandas, Scikit-learn, TensorFlow, Keras

- Developed a CNN to classify images as sun or moon.
- Used image processing and deep learning techniques to improve accuracy.

3.Restaurant Review Sentiment Analysis (NLP)

Tools: spaCy, Python, Pandas, Scikit-learn, TensorFlow, Keras

- Processed restaurant reviews to classify sentiment as positive or negative.
- Applied spaCy for text cleaning and used ML algorithms for sentiment classification.

LANGUAGES KNOWN

English, Tamil, Kannada (Speak)
